Future Fibre Technologies opens Middle East office

Developer, manufacturer and installer of fibre-optic intrusion detection systems, Future Fibre Technologies (FFT), has opened a new office in Dubai.

The new office will service the company's growing activity in the Middle East and North Africa (MENA) region and signals the company's commitment to increasing awareness and knowledge of fibre-optic based security solutions in the Middle East. It will house a full demo suite for Technical Training & Product Demonstrations.

The Dubai office, which complements the company's other offices in Australia, the USA and the UK, will be managed by Adam Wilding-Webb, FFT's newly appointed MENA Regional Manager.

Mr. Wilding-Webb brings to his new role very relevant experience of security products and systems from his years in Dubai.

Strategically located at the prestigious Dubai Internet City, the new office will offer technical and sales support to FFT's existing and new clients and projects in the Region.
